PhraseNote v0.16.10

PhraseNote User Guide

A phone-first sketch app: paint chords, write or sing a melody, and hear it with accompaniment and drums.

0 Getting started

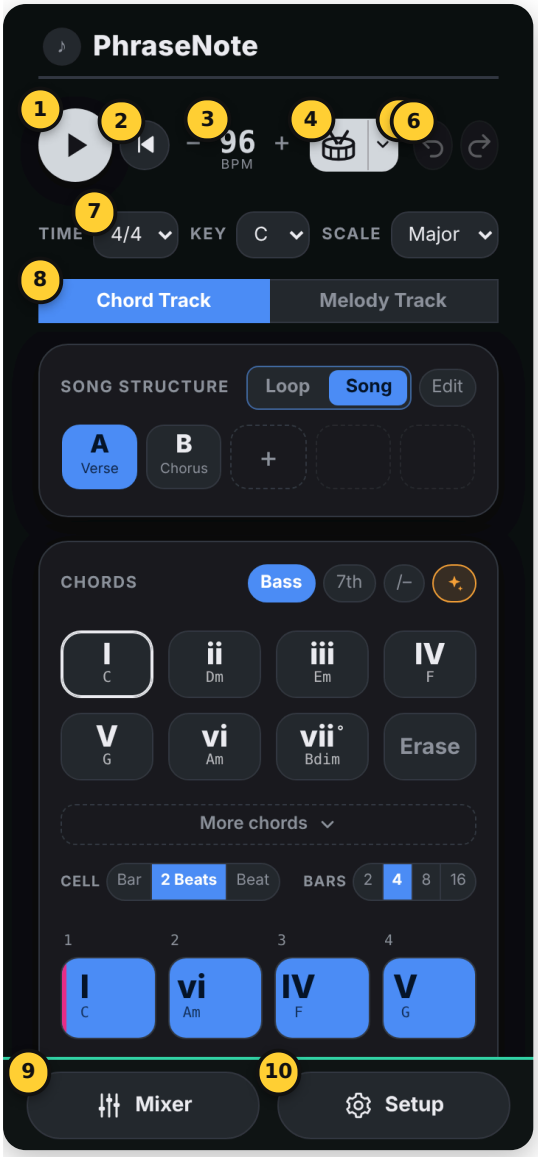

- **App address** https://minux22.github.io/PhraseNote/
- **Samsung Internet** Menu (☰) → Add page to → Home screen → Add
- **Chrome** Menu (⋮) → Install app or Add to Home screen
- Installed, it opens full screen and works offline after the first visit.
- **Updates** After a new version is out, close the app completely and open it twice. The version is shown at the bottom.
- **Auto-save** Your work and recordings are kept on the phone. Use Save project to back up or move to another device.

13 · Saving and opening
14 · Sound
15 · Good to know

1 Main screen

The top part is the same on every screen.

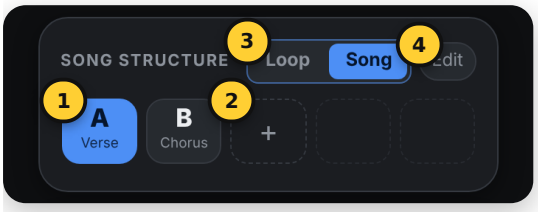

1. Play / Stop
2. Back to the start
3. BPM: − + or tap the number to type
4. Drums on / off
5. Choose a drum pattern
6. Undo / Redo
7. Time · Key · Scale
8. Chord Track / Melody Track
9. Open the mixer
10. Setup: saving and sound

> The bottom buttons (Keys · Mixer · Setup) open one panel at a time.

2 Song structure

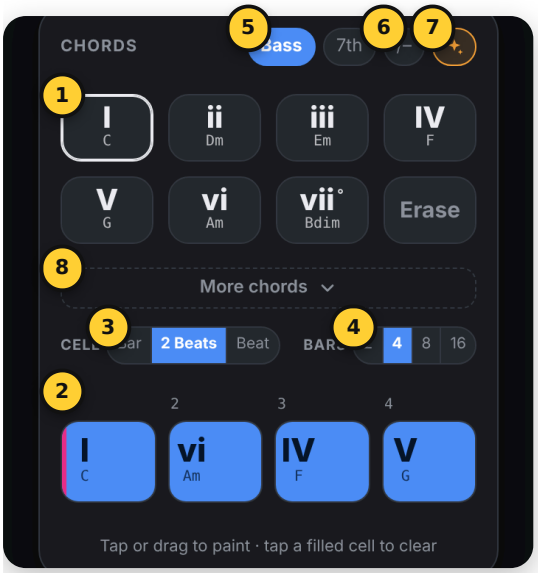

A song is a row of slots, each playing a section (A, B …).

1. Slot: tap to select. Long-press and drag to reorder.
2. + : new section, repeat a section, or import one from another project
3. Loop = repeat the selected slot · Song = play the whole song
4. Edit: the slot's section, its role (Verse · Chorus …), move · duplicate · delete

3 Chords

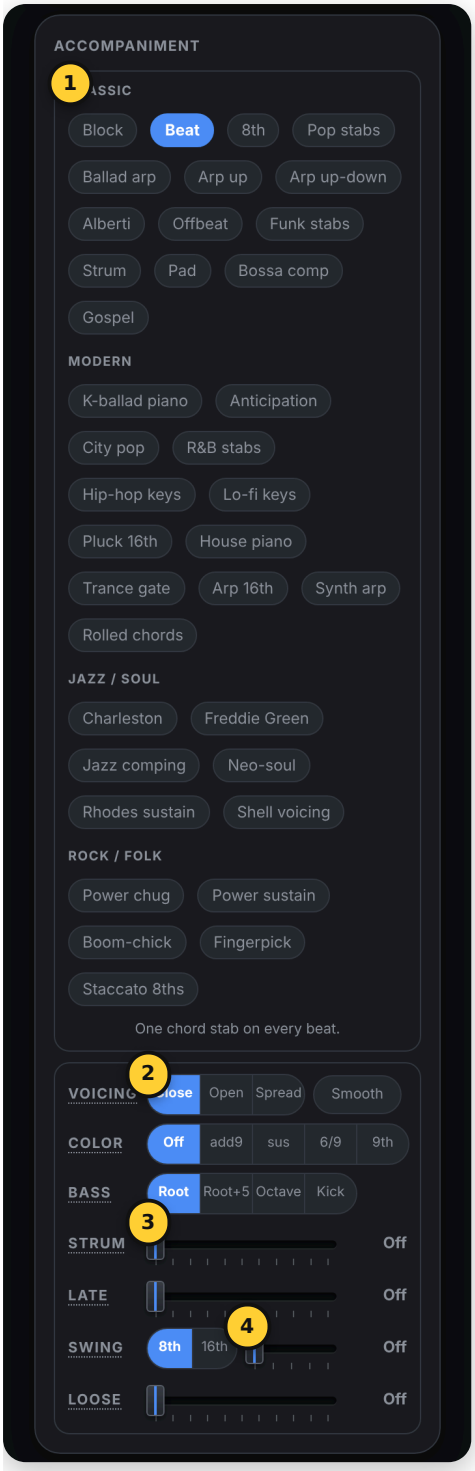

Pick a chord in the palette and paint it on the grid.

1. Palette: tap to hear and select.
2. Grid: tap or drag to paint. Tap a painted cell again to clear it.
3. Cell: length of one cell
4. Bars: bars in this section
5. Bass on / off · 7th: seventh chords
6. /– : bass note of a slash chord
7. Dice: random progression. With a melody in the slot it becomes Suggest: chords that fit the melody (tap again for another).
8. More chords: chords outside the scale

4 Accompaniment

How the chords are played. Each section can have its own.

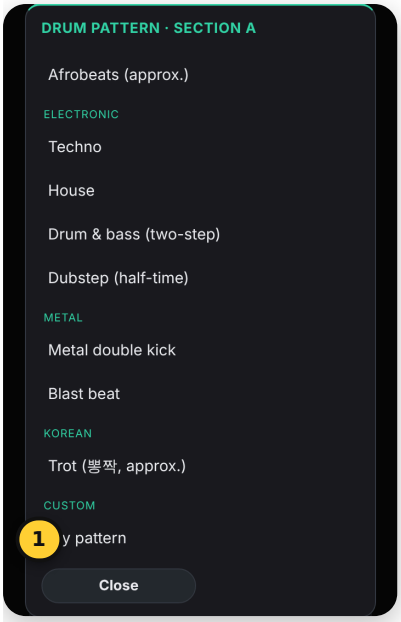

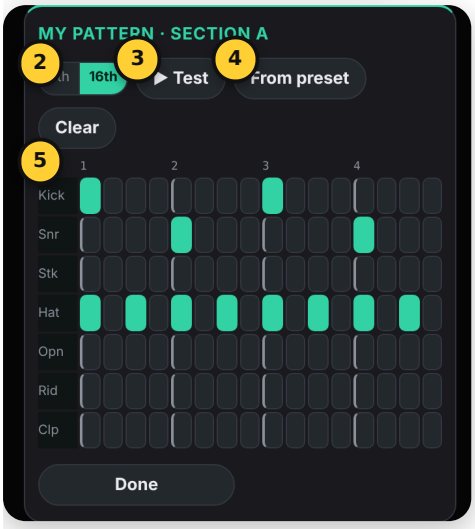

1. Style: picking one also sets matching options.
2. Voicing · Color · Bass: chord spacing, colour tones, bass rhythm
3. Strum · Late: spread like a guitar, play slightly behind
4. Swing · Loose: shuffle feel, human timing

> Tap an option’s name for a short help text.

5 Drums

The arrow next to the drum button opens the patterns.

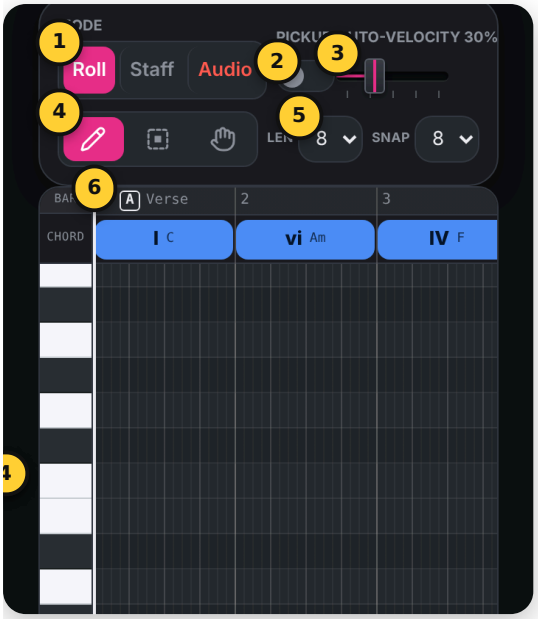

1. My pattern opens its editor right away.
2. 8th / 16th: grid resolution
3. Test: hear the pattern alone
4. From preset: start from the chosen pattern
5. Tap cells on and off. Done closes it.

6 Melody · piano roll

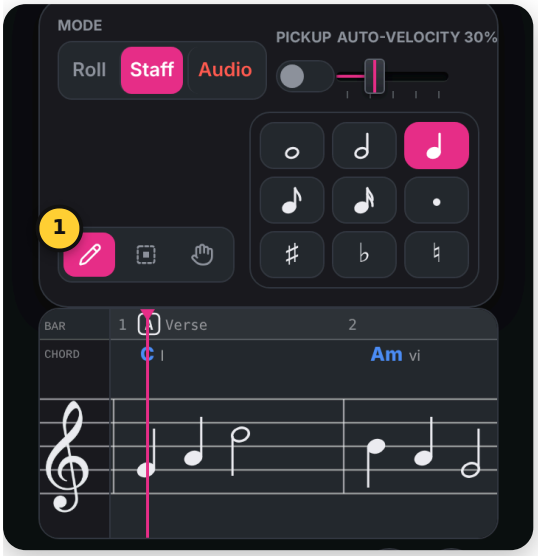

Roll mode of the Melody Track. The chords are shown above as a guide.

1. Mode: Roll · Staff · Audio (singing)
2. Pickup: add a pickup bar
3. Auto-Velocity: accents the melody on the beat
4. Tools: Pen (tap = add, drag = length / pitch, tap a note = delete) · Select (box to copy, move, delete) · Hand (scroll)
5. Len · Snap: new note length and grid
6. Chord lane (zoom with − + at the bottom right)

7 Melody · staff

In Staff mode you write on the stave.

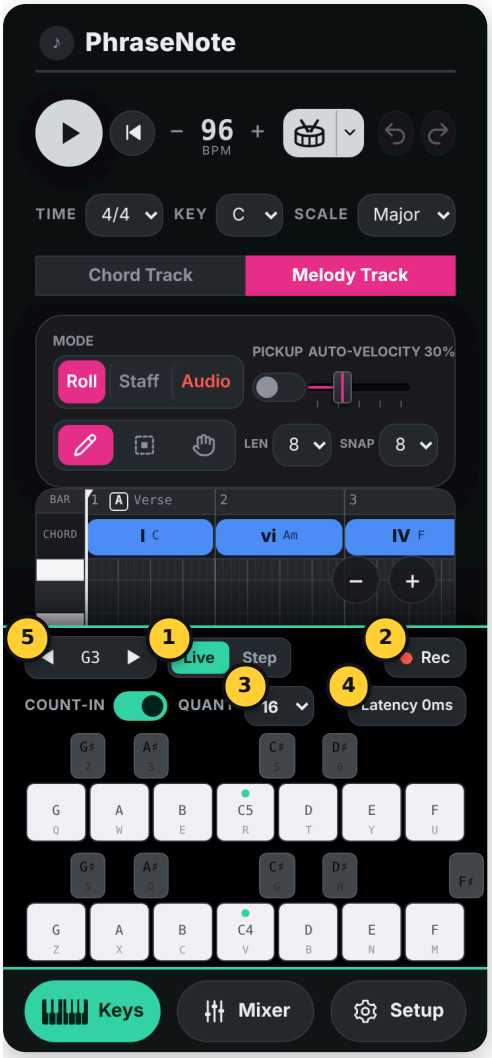

1. Tools: Pen · Select · Hand
2. Note value
3. Dot
4. Accidental (♯ ♭ ♮)

> Hold on the stave and drag up or down to hear and choose the pitch.

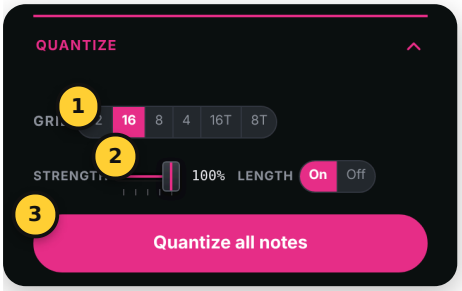

8 Playing it in (Keys)

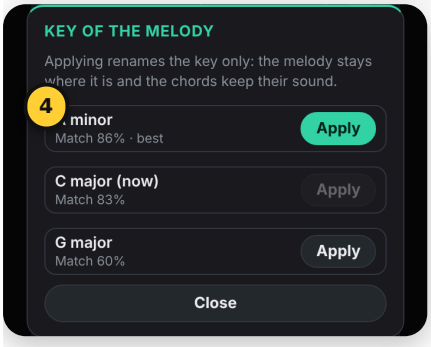

Keys opens an on-screen keyboard in the Melody Track.

1. Live: record what you play · Step: one note per tap
2. Rec: arm, then Play: one bar count-in, then recording
3. Quant: tidy the timing of recorded notes
4. Latency: compensate the phone's audio delay
5. ◀ ▶: shift the keyboard range

9 Quantize · key guess

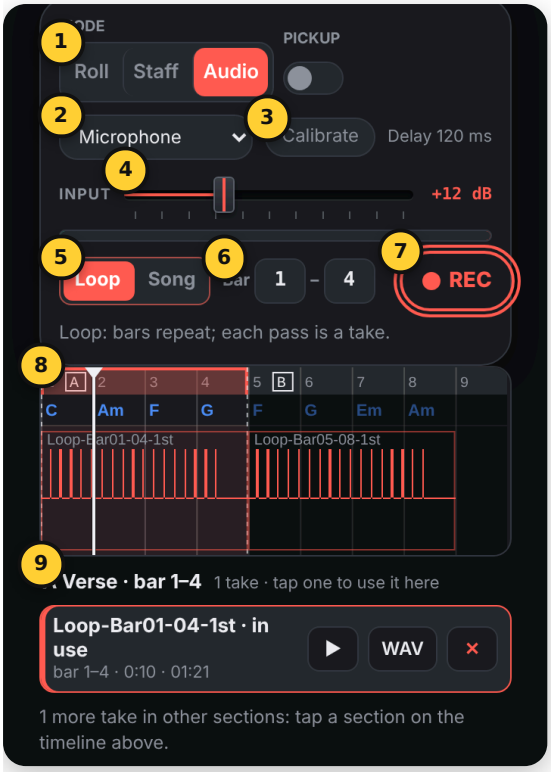

1. Quantize Grid: what to snap to
2. Strength: how far to pull
3. Quantize all notes: do it
4. Top of the Key list, "Guess from melody…": three likely keys. Apply only renames the key; notes and chords sound the same.

10 Singing (Audio)

Record with the microphone over the backing. Wired earphones are recommended.

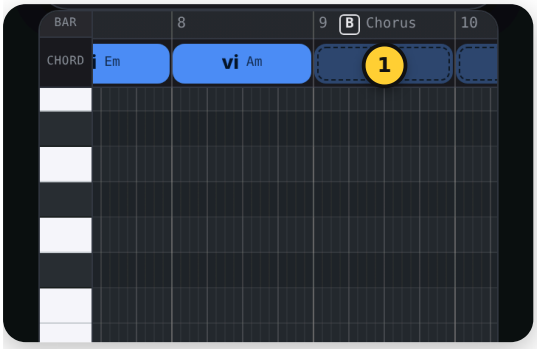

1. Choose Audio in Mode
2. Input device
3. Calibrate: once, earphones out and volume up, to measure and correct the delay
4. Input: microphone boost. A red number means too loud.
5. Loop / Song: Loop = repeat the bars and record every pass as a take · Song = from the playhead until Stop
6. Bars to loop
7. REC: one bar of backing, then recording. Tap again to stop.
8. Timeline: tap a section to select it; the take chosen for each section is shown.
9. Takes of the selected section: tap = use it here · ▶ listen · WAV export · ✕ delete

> To silence the MIDI melody while recording, mute MIDI (M) in the mixer.

11 Keep going with Loop

With the Chord Track on Loop and the last slot selected, a dashed copy of that slot waits after the song.

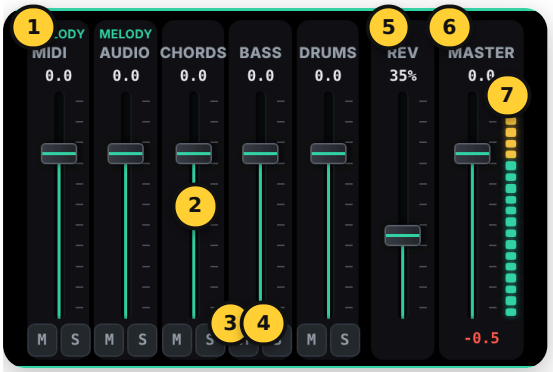

1. Draw notes in it, or record past the end, and the song grows by itself.

> Looping an earlier slot inserts the copies right after it and moves later sections back. In MIDI recording, copies left without notes are removed when you stop.

12 Mixer

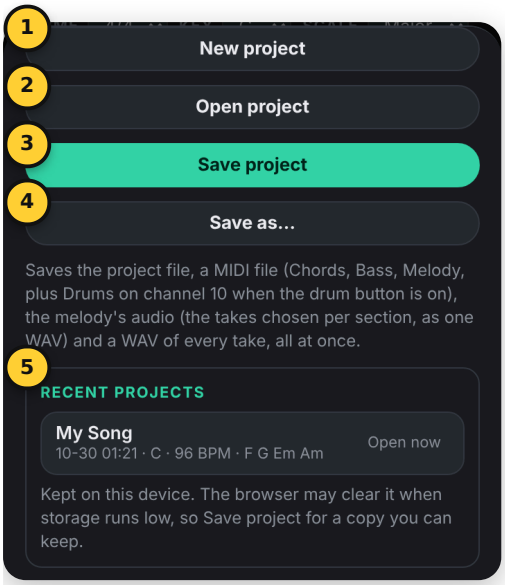

Level, mute and solo for each part. Saved with the project.

1. Melody has two channels: MIDI and Audio (recordings).
2. Fader: 0.0 = default. Double-tap to reset.
3. M: mute
4. S: solo (only soloed channels play)
5. Rev: reverb amount (SoundFont sounds)
6. Master: overall level
7. Level meter: up to yellow is right; if red lights often, lower Master.

13 Saving and opening

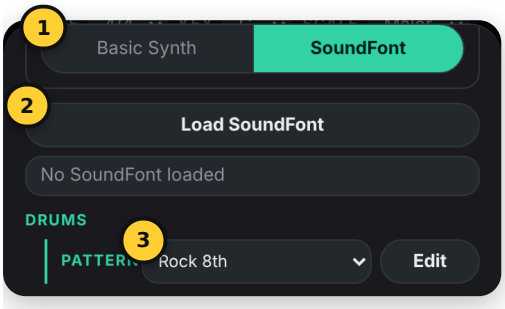

In Setup → Project.

1. New project
2. Open project: a .phrasenote file or a saved .zip
3. Save project: one .zip with the project, a MIDI file, Melody.wav (the takes chosen per section, joined) and a WAV per take. Asks for a name only the first time.
4. Save as: a copy under a new name (v2, v3 …)
5. Recent projects: the last 10 stay on the phone

14 Sound

In Setup → Sound.

1. Basic Synth: works without files · SoundFont: sampled instruments
2. Load SoundFont: load a .sf2 and pick an instrument per track. Then Save / Load preset keeps the sounds and the mixer balance together.
3. Drum pattern and Edit

15 Good to know

- Clearing site data or uninstalling the browser can delete projects and recordings on the phone. Back up with Save project.
- Record in the installed app (or its address). Previews inside other apps may block the microphone.
- Files are saved to Downloads as a .zip. Saving straight into a chosen folder is not supported yet.
- Some accompaniment styles and genre drums are 4/4 only. Patterns approximate a genre’s feel.
